

The following installation procedure is only required once for the life of your remanufactured ink cartridge.

Note: Warning screens may vary from the examples shown below.

Step1: Upon installation of a new ink cartridge a warning message may appear to confirm that installation has taken place.
Press OK to continue.

Step2: Upon sending the first print job to the printer an additional warning may appear instructing you to either cancel or resume printing without the ink detection function. In order to clear the warning **DO NOT CLICK** the **OK** or **Cancel Printing** buttons and proceed to step 3.

Step3: Press the **RESUME** button on the printer to start the printer start-up sequence and start printing. This process may take a few minutes.

The Resume/Cancel button is typically located on the printer as shown. Please refer to the printer's use manual for further assistance.
